# Go Ahead & Take All The Credit

The new *Pierre Unlabeled*™ butcher-wrap sandwich portfolio highlights your brand on our quality grab-and-go sandwiches!

## How It Works:

### STEP 1 Order Your *Pierre Unlabeled*™ Sandwiches

Sandwiches arrive butcher-wrapped with:

- Blank front to accommodate your customized label.
- Affixed, pre-printed back label featuring heating instructions and ingredient and caloric information required for retail sales.

### STEP 2 Purchase customizable product label fronts from a vetted supplier

- Work directly with supplier to purchase **pre-designed product label fronts** with **space for your logo at the top**.
- Provide artwork for your logo or personalized graphics/die lines to supplier.
- Labels are delivered in rolls.

## OR Design And Print Your Own Custom Label

Simply order your choice of sandwiches from **Pierre Unlabeled™** brand and work with a supplier you choose to design and purchase labels you affix to the wrapper front.

*NOTE: Back label is pre-printed with sandwich name (e.g. Bacon, Egg & Cheese Biscuit) and affixed to sandwich wrapper. Operator front label sandwich name must match the back label name.*

# Tyson Foods Warm Sandwich Handling Instructions

Use these guidelines when preparing warm sandwiches. Consistently following these points should ensure a safe experience when handling the product.

**Warmer and surrounding areas should be kept clean at all times.**

1

All fully cooked sandwiches are delivered frozen. Thaw product completely for 18-24 hours under refrigeration of 37°F-39°F. Clearly mark the master case with the date the product is placed in the cooler and "Use By" date based off of stated refrigerated shelf life.

2

Thawed sandwiches can be held under refrigeration based off of the refrigerated "Sell By" date of the specific product. Keep product in refrigeration until ready to heat.

3

Preheat warmer to 165°F before filling with sandwiches.

4

Heat sandwiches according to heating instructions as indicated on the back label. Keep product in original packaging. Do not unwrap.

5

Sandwiches must be heated to an internal temperature of 165°F. Verify using a probe thermometer by inserting under the back label.

6

Mark the time to discard the heated product on the back label of the sandwich.\* "Sell By" time is 4 hours from the time of product heating.

7

Place wrapped, heated sandwich in the warmer.

8

As sandwiches are sold, move the older product from the back of the warmer to the front. Check to make sure the product is maintaining an internal temperature of 140°F. Discard any sandwiches if they have been in the warmer for more than 4 hours.\*

\*Local food codes may vary

Always use disposable, food-safe gloves when handling the food.

# Tyson Foods Cold Sandwich Handling Instructions

Use these guidelines when preparing cold sandwiches. Consistently following these points should ensure a safe experience when handling the product.

All sandwiches are delivered frozen. Always use disposable, food-safe gloves when handling food.

Coolers, refrigerators and other food storage equipment in addition to surrounding areas should always be kept clean.

1

Refrigerate product at 37°F-39°F for 18-24 hours or until completely thawed.

*Note: Do not thaw at room temperature.*

2

Mark each sandwich clearly with both the date the product is placed in the cooler and a specific “Use By” date based off of the stated refrigerated shelf life.

3

Keep product refrigerated before serving.
